

產品名稱

(中) 會說話且會聽話的聰明咖啡機

(英) The smart coffee machine embedded the function of talk and listen.

一般的全自動咖啡機只能使用按鍵操作，看不懂圖示或沒有使用說明書時，使用者通常不敢亂按，而會錯失一杯美味的咖啡。

本產品將全自動咖啡機改用雙向語音溝通的方式操控，咖啡機會使用語音引導，讓第一次接觸咖啡機的使用者也能操作，降低自動咖啡機的使用門檻，讓咖啡機變得更為人性化；同時保留手動操作方式，讓咖啡機的操作更為多元。

The coffee machine is very popular in many houses, restaurant, and offices. The automatic coffee machine is designed to accept the command of the buttons in the panel. But many people have the experiences that it is difficult to decide the button to be pressed at the first contact.

The new designed coffee machine is going to change the world. It can talk to the user to let him know how many selections he has. It can also listen to the user to get the voice command from the user. It can even repeat the voice command in voice to let the user confirm the operation. The new coffee machine is smart and friendly.
